**Personal Matters/Ex. 6**

Unique and I mean unique . For the entire agency. I can't begin to thank you for all you have done. I think all of us have these feelings. I know I do. I witnessed dedication like I have never seen and I am proud of all of you. Everyone that has had a piece of this was amazing. We will continue to be amazing  
Call me if you need to talk.

**Subject:** map to review RE: King Gold Mine Public Viewer

All - I created a draft revision Web CMS page with the working Map code.  
Please fwd to anyone not on this "Reply all" msg.

1) You will have to log-in to see the draft revision.

**Use this link to log in using your standard EPA computer ID and password.**

<https://wcms.epa.gov/user?destination=node/106189/revisions/221415/view>

2) if I may offer one comment - change default to "on" for the EPA data points.

3) As of this email, I'm handing off to Tim Davis' capable hands. I will be back on-call tomorrow 9-5 ET (7-3 MT).

Jeff,

I was able to view the page in wcms and  
the iframe looks to be working correctly.  
The [CLICK HERE for full-screen](#)  
[map](#) works as well, but I would change the  
target to open in a new window since there

is no way to navigate back to the [epa.gov](http://epa.gov) page from the application itself.

Remember, you are looking at content now of a test layer. The viewer that we are polishing up will have information regarding that feature.

Those features are also displayed in the legend so users will know what those points are representing.

<[Morin.Jeff@epa.gov](mailto:Morin.Jeff@epa.gov)> wrote:

If I can offer a technical suggestion, best is to provide a simple code to post, like a iFrame. The map viewer we posted yesterday embedded the map in an iFrame tag, which worked fine.

Best to avoid having to upload support files, external javascript or xml calls, or CSS .classes. The EPA Web CMS disables those, or makes them difficult to work around.

Dan,

Based on the conference  
call with Eric Delgado,

Marty McComb, and myself I am codifying some of the points we discussed.

The OPS viewer url and login info is below. This viewer is a more robust version of the Public Version.

### **Nonresponsive Conference Code**

The tentative timeline for the viewer will be tomorrow morning for a slimmed down version of the Public Viewer by tomorrow morning. It will contain locations and data displayed that have been submitted to HQ in the three links – trend graphs, analytical link, and water quality. The tool, SADIE, that is in the OPS viewer is going to be replaced with a webpage based analytical report. Over the course of a few days (possibly by Monday) we will finish QC'ing the latest monitoring data and working through the data differences between the three regions.

Eric/Marty/Janine,

If there is anything you  
want to add or about this  
please chime in.

Thanks everyone,

Dan
